Betting on Super Spin Roulette Live

It's important to understand the two main bets types

in Super Spin Roulette. Not least 4 because one type will get the benefit of the multipliers and the other type will not.

The two bet types are:

Outside 4 Bets – These

are bets placed on the outside of the betting grid. These tend to be the Even Money 4 bets, like Red/Black, Odd/Even, High/Low and Column Bets and Dozen bets, which pay 2:1.

Inside Bets – these are individual 4 numbers or combinations of numbers and have normal payouts of between 35:1 to 5:1. It is these bets that multipliers 4 will be paid on, and also the bets that have their normal payouts reduced (which pays for the multipliers).

The outside 4 bets play as they do on a regular European Roulette table, so there is no harm in playing those bets 4 on the Super Spin table, you'll get the same return.

The implications of playing the Inside bets and the impact the 4 multipliers have on the payouts does need some explanation.

Inside Bets

Straight Up Bet –This is a bet

where your chip covers 4 one number on the betting grid. There are thirty-seven numbers to choose from. You can place as many straight-up bets 4 as you like. The multiplier payout will be for the full amount. Payout = Straight-up Bet amount x Multiplier.

Split

Bet 4 – This is a bet where your chip covers two numbers – so half the amount is on one number 4 and half on the other. You cover two numbers with one bet. The multiplier payout for a Split bet is 4 half. Payout = Split-Bet amount x multiplier divided by two.

Street

Bet – Your chip covers three numbers across the betting 4 grid. There are 12 rows to place bets on. The multiplier payout for a Steet Bet is a third. Payout 4 = Street Bet amount x Multiplier divided by three.

Corner/Basket bet – This is a bet where you place your chip 4 on the intersection where 4 numbers meet. Hence the corner. The multiplier payout for a Corner bet is a quarter. $4 \text{ Payout} = \text{Corner Bet Amount} \times \text{multiplier} \text{ divided by } 4$.

Line Bet – A line bet covers 12 numbers with one 4 chip. The multiplier payout for a line bet is a sixth. $\text{Payout} = \text{Line Bet amount} \times \text{multiplier} \text{ divided by } 4 \text{ six}$.

Section Bets/French Bets can be used to cover sections of the wheel. The racetrack is used to place these bets 4 that will automatically place a combination of inside bet types to cover all the numbers. The multiplier payouts are a 4 per specific inside bet type. Popular bets include Voisins, Tiers, Orphelins sections of the wheel.

The neighbours' bet is another way 4 to cover numbers, often resulting in straight-up and split-bets being placed.
