A Flush is made up of 5 cards all in the same suit. It comes in fourth place in the 0 poker hand rankings - below a full house. For example, AJ752 is an ace-high flush in hearts.

Although the word flush 0 doesn't immediately have you thinking that it consists of five cards all in the same suit, it's still an easy 0 hand to recognise. A flush is a relatively strong hand in Texas Hold'em with the highest possible flush being ace-high 0 with all 5 cards in the same suit.

The best Flush possible is the ace-high Flush:

AJ1032

When it comes to flushes, the 0 suits don't matter. However, not every ace-high flush is ranked equally. When it comes to rating one ace-high flush over 0 the next, it's the hand rank or denomination that's important.

*Note that a

straight to the Ace in any suit, counts 0 as a Royal Flush and neither ranks better than the other in the hand ranking system.

How Does a Flush Hand 0 Rank?

In a 52-card deck,

there are 5,108 possible Flush hand combinations and 1,277 distinct ranks of Flushes. Each flush is 0 ranked by its highest card, then by the rank of its second-highest card and so on.

Here are some examples of 0 a few flushes:

AJ1032

K10752

AKQ82

QJ1093

Can you tell which Flush ranks the best?

Keep in mind that the ranking of a Flush is determined 0 by the highest straight card – not the suit. If more than one player has a Flush, then the winner 0 is determined by the player with the highest straight. So, for example, a King-high Flush

– in any suit - 0 beats a Queen-high Flush – in any suit, and so forth.

Also, a

K-J-10-5-3 flush would beat a K-J-9-8-3 flush. Notice 0 that in the first hand the third card 10 is higher than the 9 in the second hand. That's what 0 makes it rank higher.

How

Does a Flush Hand Match Up?

A Flush is the fourth best possible hand in the poker 0 hand ranking system. A Full House ranks directly above it. Although 4th on the list, it is still a very 0 strong hand in Hold'em and is rarely beat on the river.

That said, there

are still quite a few hands that 0 rank under it. The next best hand down on the list is called a Straight.

The best Straight is the ace-high 0 straight – also known as “Broadway”.

Flush Poker Probabilities

Now, we'll look at the pre-flop, flop, turn and

river probabilities of making 0 a Flush in both Hold'em and Pot Limit Omaha.
